

Attention SERVE-NZ users

New version 5.5 of SERVE-NZ now available!

This new version delivers a number of major enhancements including:

- Iodine nutrient values available for the first time, plus more foods and updated nutrient values from Foodfiles 2006 data update from Crop and Food
- New Nutrient Reference Values (RDI values or Adequate Intakes, Estimated Average Requirements and Upper Levels) based on the 2006 new standards release plus corresponding RDI reporting refinements
- New Upper Level report that shows where nutrient intake exceeds the new Upper Level values
- New food information reporting: obtain a list of recipes or a list of food intakes which the selected food is used in
- New customisable reporting when nutrient intake is outside specified ranges
- New blood sugar level reporting facility to compare levels recorded during the day with sugar intake levels derived from food intake.

UPGRADE OPTIONS	Price
From version 5 to 5.5	A\$95
From SERVE 4 or 4.1 to 5.5	A\$195
From earlier versions of SERVE	A\$265
